

IP Telephony Headset Portfolio

You already know the advantages of IP Telephony: the cost benefits, expanded services, flexibility and scalability. But do you know how to get the most out of it? IP Telephony delivers a much wider bandwidth than traditional telephone networks. That means much more natural, and more intelligible, sound quality—but only if you have a headset that can reproduce all those highs and lows.

GN Netcom can. GN Netcom has always stood for sound quality. And for innovation that drives productivity. Our VoIP headset portfolio is proof of our heritage—and our vision. No matter where you are on the VoIP adoption curve, GN Netcom has the future-proof headset option. And every GN Netcom IP Telephony headset is plug 'n' play compatible with PCs or Macs, and every popular broadband application.

Converged: For use with your desk phone and PC.

Available Q2

GN 9350 Wideband wireless headset.

Dual-mode flexibility. DSP-enhanced wideband sound. Plus 300 feet of wireless freedom. All in a lightweight, ergonomic design. It adds up to the high-performance GN 9350, the world's most advanced wireless headset.

- Superb, DSP-enhanced sound quality
- Wideband audio supports full VoIP bandwidth
- Three wearing styles: headband, earhook and neckband

GN 4800 HiFi HiFi stereo headset.

You want high-fidelity performance and dual-use versatility? The lightweight GN 4800 HiFi lets you listen to high-fidelity music. And use either your desk phone or IP softphone—without having to switch from headphones to headset and back.

- Lets you create your own workspace in noisy environments
- Provides a smooth migration path to IP telephony
- Automatically mutes music when you get a call

GN 4800 Wideband Wideband stereo headset.

If you need a durable dual-use headset with solid sound quality, pick up the GN 4800 Wideband. It turns a noisy office into a private workspace. And lets you enjoy the seamless integration of broadband, traditional telephony and music, without changing headsets.

- Rugged, real-world design
- Automatically mutes music when phone rings
- Provides a smooth migration path to IP telephony
